For comparison, note this week 9/30/58, housed DE 12/58, even after had begun pen time, was averaging over 60% 7 through 10, 1959, and while they were moulting their production for the first month was 42.5%.

~~DE flock hatched 1/59 - housed 216. Reduced to only~~ 68.1 ~~2~~%, 1 week, & when only 10 moults did, were below 50%. Note ~~is~~ decide high chlortrin from cannibalism & pen time moulting.

~~Note of 2/22/59 says one hen died next day due~~ ~~first one to die from any reason. Next death~~ following ~~evidence~~. ~~Population down to 154 by~~ ~~3/19/59, when 35 pullets were added from DE, bring-~~ ~~ing population to July 189. On 4/30/60, added~~ ~~hens from DE.~~

This flock was started 1000!

Compute: Best egg production

15 month 34,219 eggs

Computation of ~~DE~~ pullets Hatched 11/59.

Total egg production

80% of ~~total~~ on Hand
2,160 of 11/59 + two Months
960 (80% because other also lay)
add 80% of 12/59 - 4/60
add 40 of 5/60 - 9/60

3/59	404
8/59	4412
9/59	4232
